P10 Pro Ultra

Flexible. Forceful. Flawless.

MOVA P10 Pro Ultra

Auto-Empty Robot Vacuum and Mop

Experience extensive cleaning with P10 Pro Ultra robot-mop hybrid. Its extendable mop and side brush tackle debris from right-angle corners, edges, and baseboards. The robot vacuum ensures detailed cleaning on hard floors and carpets using the self-cleaning dock, robust 13,000Pa suction, and CleanLift™ system.

Key Features

Tight Spots Don't Stand a Chance

With the FlexReach™ tech*, P10 Pro Ultra extends its mop up to 4cm (1.57in)** deep and side brush to wipe off hidden debris from challenging spots like right-angle corners, under the low-profile furniture, and along the edges and baseboards.

Easy Dry and Spotless Carpets

Enjoy efficient vacuuming with the CleanLift™ system, which features cutting-edge mop and side brush lifting. P10 Pro Ultra lifts its mops to 10.5mm (0.4in)* and side brushes to 10mm (0.39in)* to ensure carpets stay dry and squeaky clean.

Touch-Free Dock Cleaning

P10 Pro Ultra can automatically clean mops and the washboard using 70°C (158°F) hot water*, dispose of dust and debris for up to 75 days*, refill water for mopping with an ample 4.5L clean water tank, and more.

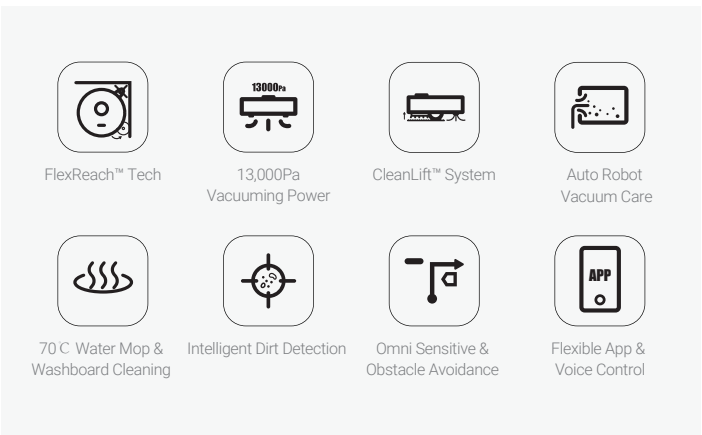

Intensive Debris Pickup for Immaculate Results

Save time and effort with forceful 13,000Pa* suction that effortlessly collects diverse debris, such as dust, hair, crumbs, and more, from carpets and hard floors. 5 adjustable suction levels* will assist you in keeping your home sparkling clean.

Specifications

Robot Vacuum Dimensions	350 x 350 x 104mm
Base Station Dimensions	350 x 457 x 590mm
Maximum Suction	13,000Pa
Side Brush Extend	✓
MopExtend	✓
Mop Lifting Height	10.5mm
Obstacle Crossing Height	22mm
Battery Capacity	5,200mAh
Dust Bag Capacity	3.2L
Dust Box Capacity	300ml
Robot Vacuum Water Tank Capacity	80ml
Base Station Water Tank Capacity	4.5L/4L

Features

What's in the Box

Package List of Robot Vacuum and Base Station

*FlexReach™ Tech: Refers to the extendable mop and side brush for improved cleaning coverage.
*4cm (1.57in): Based on a calculation derived from environment testing in our in-house lab. Actual performance may vary depending on usage.
*10.5mm (0.4in): The height difference of the robot vacuum is 10.5mm (0.4in) before and after mop lifting. For carpets with piles longer than 3mm (0.12in), we suggest you set the robot vacuum to avoid medium and high-pile carpets via the cleaning app and protect your carpets from getting wet.
*10mm (0.39in): Based on our in-house lab data. The lifting height is defined as the distance between the top of the brush bristles and the ground after the side brush has been lifted.
*70°C (158°F): The data comes from our in-house lab. Based on the standard room temperature environment (about 23°C), the water in the water tank after heating, the outlet temperature is up to 70°C. Due to the environmental impact of water temperature fluctuations, the actual temperature will be adjusted accordingly.
*75 days: Based on a calculation derived from environment testing in our in-house lab. Actual performance may vary depending on usage.
*13,000Pa: Based on our in-house lab data. Actual performance may vary depending on usage.
*5 suction levels: Quiet/Standard/Turbo/Max/Max+ (Only available in Mop after Vac Mode).
