A FAIRY-TALE VISION REALISED

Neuschwanstein Castle seems like a whimsical dream manifested in stone, where historical nostalgia meets modern ingenuity, leaving visitors enchanted by its story and splendour. Commissioned by King Ludwig II of Bavaria in 1869, it stands as an architectural testament to Romanticism and 19th-century historicism. Perched high in the Bavarian Alps, the castle was originally conceived as a private retreat filled with art, Ludwig's ingenious inventions and secret passageways, with diverse influences spanning from Wagner's operas to medieval mythology. Ludwig's deep fascination with swans and chivalric ideals infuses the design, underscoring his legacy as the 'Swan King'.

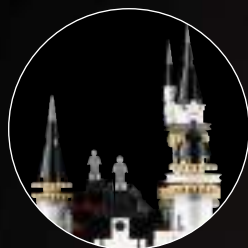

Designed by Christian Jank and constructed by Eduard Riedel and Georg von Dollmann, the castle's eclectic architecture combines Romanesque, Gothic and Byzantine influences. Despite being unfinished at Ludwig's untimely death in 1886, its silhouette and innovative amenities have become synonymous with his uniquely visionary spirit. Remarkably, just a few weeks after his passing in 1886, the castle opened to the public. Today, it is one of the most visited castles in the world, inspiring countless works of art, films and pop culture.

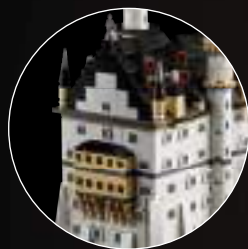

STAIRCASE TOWER

Marks the highest point of the castle at over 65 m (213 ft.) tall

POINTED SPIRES

Iconic elements contribute to the castle's grandeur

BALCONIES AND GABLES

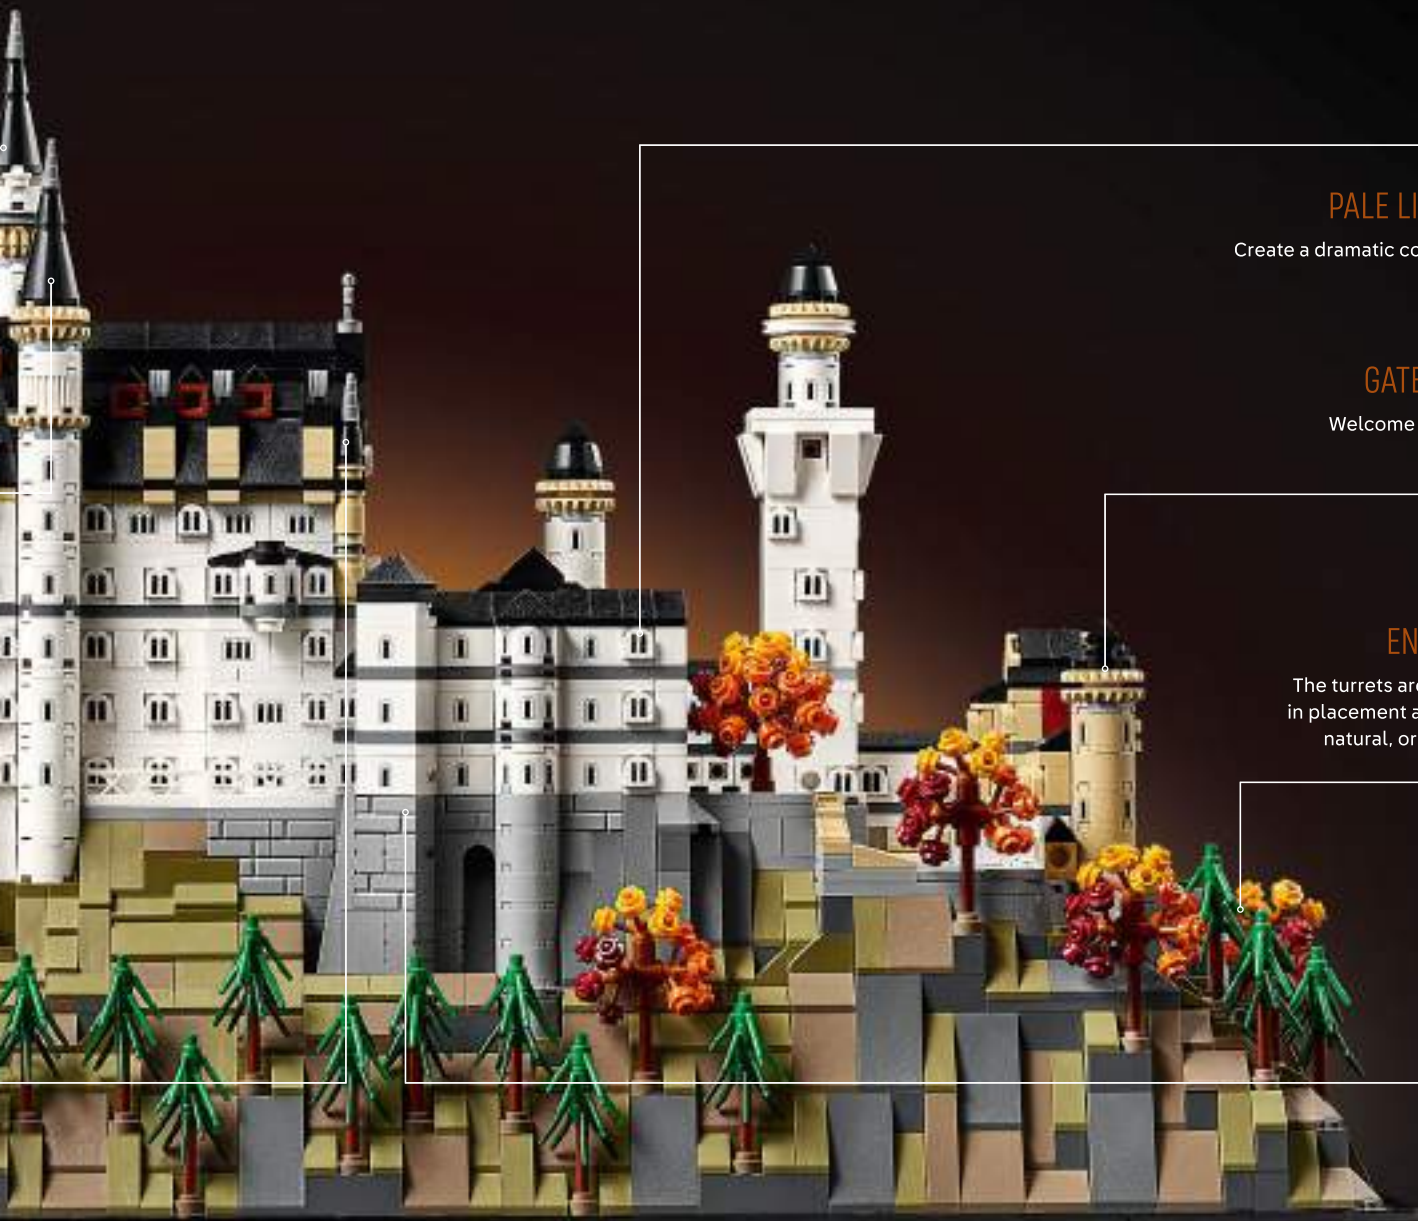

Add to a theatrical fairy-tale look

ORNAMENTAL PINNACLES

Medieval-inspired details emphasise artistry

PALE LIMESTONE WALLS

Create a dramatic contrast against the dark turret roofs

GATEHOUSE TURRETS

Welcome visitors with a blend of defence and elegance

ENTRIES AND EXITS

The turrets are deliberately irregular in placement and size, enhancing the natural, organic feel of the castle

ASYMMETRICAL LAYOUT

Enhances a sense of natural charm

MEDIEVAL MEETS MODERN ARCHITECTURE

The interior design in the original parts of the castle famously combines historic references mixed with contemporary art and all the groundbreaking technology and amenities for its time. Modern toilets with flush systems, an electric call system to summon servants and central heating systems all showcase Ludwig's extravagant taste for advanced design and comfort. We included familiar details found in both the Throne Room and Ludwig's apartment, so keep an eye out for references as you build.

EXPLORE AS YOU BUILD

KING'S BEDROOM

The king's bed is decorated with Gothic carvings that mask a hidden chapel door.

STUDY

The study features a LEGO® representation of Ludwig II's cherished swan sculpture.

HIDDEN PASSAGES

Lead to a secret, artificial dripstone cave that – in the real castle – featured lighting and a waterfall!

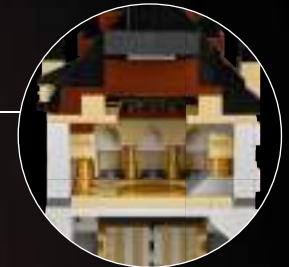

FLOOR PLAN

Ludwig II's living quarters in Neuschwanstein Castle are located on the third floor of the Palas (main building), specifically in the east wing. This section includes his bedroom, dressing room, study, salon and grotto.

THRONE ROOM

The Byzantine-inspired splendour is seen in the Throne Room, famous for its elaborate mosaics and gilded arches. Although designed to hold a majestic golden throne, Ludwig was deposed before it could be installed, leaving an empty space at the top of the grand staircase.

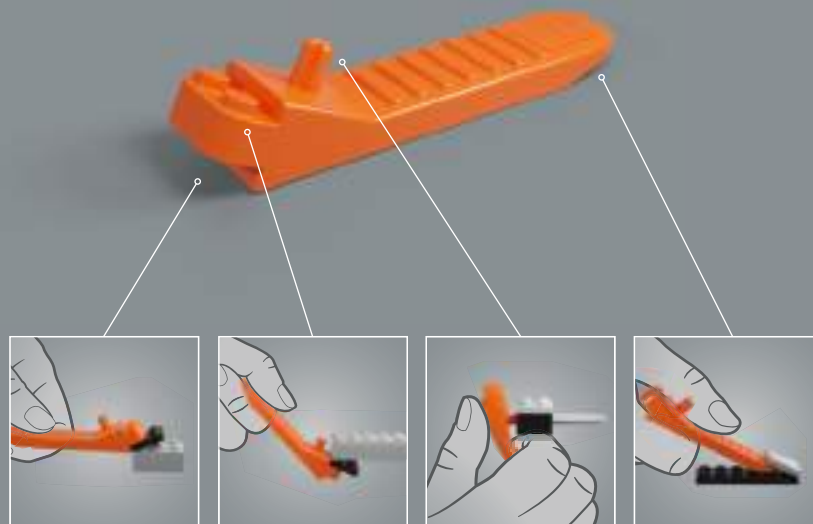

FROM THE LEGO® ARCHITECTURE DESIGN TEAM

With his boundless imagination, King Ludwig II, had he lived today, might very well have been a LEGO® fan! Everywhere in Neuschwanstein Castle, we see examples of his playful creativity. Turrets and spires are placed as if he were crafting a fantasy kingdom, brick by brick. At least that's how we envisioned it while striving for a realistic, enjoyable experience and a faithful representation of his vision. The LEGO landscape in the model is designed to allow for a quick progression while still retaining the detail of the rugged natural setting. The main building experience focuses on constructing the intricate buildings of the castle complex.

We aimed to capture the various turrets, chimneys, staircases and gabled roofs with the utmost accuracy, while a record number of new, printed graphic decorations (237!) capture the various signature windows that adorn the buildings. The model includes a full extra set of deciduous trees, giving you the option to display it with a summery, green, gradient colour scheme OR an autumnal, yellow/orange/dark-red colour scheme. We hope that by building this model, you will feel inspired to visit – or revisit – this magnificent castle.

You enter the castle complex through the symmetrical Gatehouse flanked by two stair towers. The Gateway Building was completed first. Its topping out ceremony was held on 11 June 1872, and it was ready for occupation by the end of 1873.

The 'Donjon' Wall, the central keep of a medieval castle, was its strongest part, designed for defence. It was made to accommodate vital rooms or quarters, serving as a fortress's secure heart in times of peril.

The square tower is about 45 m (approx. 148 ft.) high, and serves as a functional part of the design, with a modest appearance. Its thick stone walls and narrow windows, which would have originally been designed for defence, give it a fortress-like quality.

A tour of the castle takes visitors through the Knights' Building (Knight's Hall/Ritterbau). Located within the upper courtyard, it represented a place for knights and noble figures of the medieval court. However, as Neuschwanstein was never used as a military stronghold, its purpose was more symbolic.
