Things to keep in mind with Wireless Headphone
Wireless Headphone should not be used in extreme temperatures.
Before using the headphone for the first time, make sure to charge them using a 5V, 24W or lower USB-C charger.
The Max. Input Watt for AUX is 50 mW.

Pairing Wireless Headphone with your phone
1. Turn on the headphone by pressing MFB for 2 seconds. You'll then hear a "Power-on" notification and the LED will flash blue and red alternately.
2. On your phone, go to Settings, turn Bluetooth on, and then pair with " Weofly Tour". Check your phone user guide to find out how to access Bluetooth settings.
3. Once paired, the headphone will automatically connect to your phone whenever you turn on the headphone.

Performing a factory reset
When the headphone are on and not pairing with your phone, press MFB quickly for 5 times to complete the factory reset. It can be connected and used normally when be powered on.

Warning:
Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE:
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
FCC Statement:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
RF exposure compliance statement:
This device has been evaluated to meet the general RF exposure requirement
