WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

The Iconic Poké Ball – A builder's dream

It's not only one of the most recognisable symbols of the Pokémon world. Every Pokémon Trainer's journey begins with your first Poké Ball, and it plays an essential part in every interaction, battle and adventure we share with our Pokémon. Its striking red-white-and-black design is a symbol of countless battles for every generation of Trainer. But what's actually inside a Poké Ball remains an intriguing mystery...

Pokémon FireRed
Pokémon LeafGreen

Pokémon X
Pokémon Y

Pokémon Sword
Pokémon Shield

From lab to **Battle**

Driven by curiosity yet respectfully acknowledging the integrity of this mystery, our team of LEGO® Pokémon™ Trainers wondered: how much LEGO magic we could build into this iconic form? From an 'impossible' concept sketch inspired by pop-up books to an idea formed to recreate memorable scenes from a classic Trainer journey inside the sphere, with help from a smooth spring mechanism that's activated when you open the Poké Ball.

Pokémon FireRed
Pokémon LeafGreen

Professor Oak's Lab

Our journey begins in Professor Oak's lab, where many a Trainer has chosen their first partner Pokémon. Placed in the upper part of the sphere, the lab marks a point of no return – Once a Trainer, Always a Trainer! This iconic location is faithfully represented down to the order of the books in the bookcase, the computer screen, wall decorations, windows – and even Trainer tools like Poké Balls and the Pokédex.

Pokémon FireRed
Pokémon LeafGreen

Bond, Train, Battle

Once you're out of Professor Oak's lab, it's time to explore, bond and battle with your Pokémon in this exciting new world. The lower part features a classic battle scene featuring Red and a Picnicker Trainer as LEGO® minifigures. They're accompanied by two exclusive new figures of some of the most beloved Pokémon of all time: Eevee and Pikachu. Both scenes are inspired by the *Pokémon FireRed* and *Pokémon LeafGreen* games.

The first of their LEGO® minifigure kind

Red

Pokémon Trainer first met in Pallet Town, in the Kanto region.

Professor Oak

Pallet Town's undisputed Pokémon expert.

Picnicker

Picnicker serves as a Trainer players can meet in battle.

Pikachu

Beloved Pokémon with a lightning bolt-shaped tail and red cheek pouches that store electricity. This LEGO® figure is the very first created on this scale, and it's ready to join your next adventure.

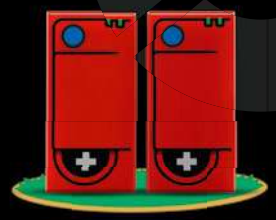

Eevee

This furry and adorable Pokémon has the ability to evolve into eight known forms. Eevee makes its debut here in this special LEGO® version.

Poké Balls

Three Poké Balls – which will you choose? These miniature models of a Trainer's first tool were designed specifically for this set.

Pokédex

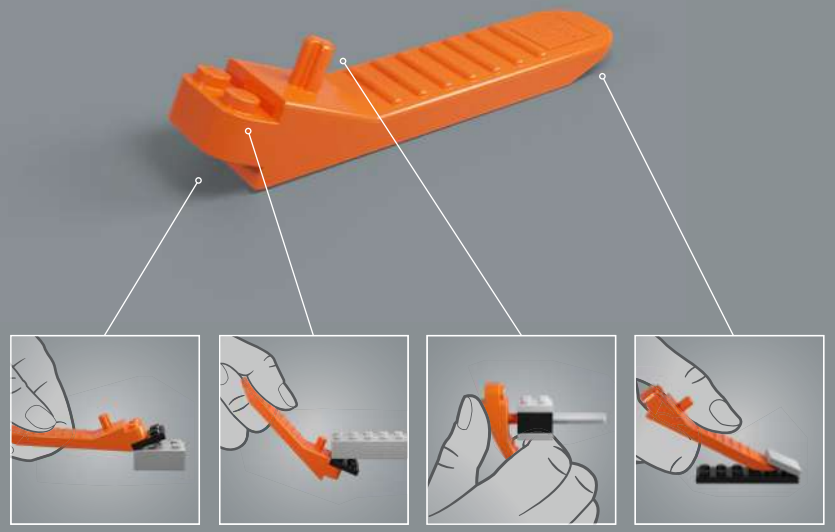

This Trainer tool, designed by Professor Oak to help Pokémon Trainers catalogue and learn more about their Pokémon. And you've just added some of the very first LEGO® versions to your collection!

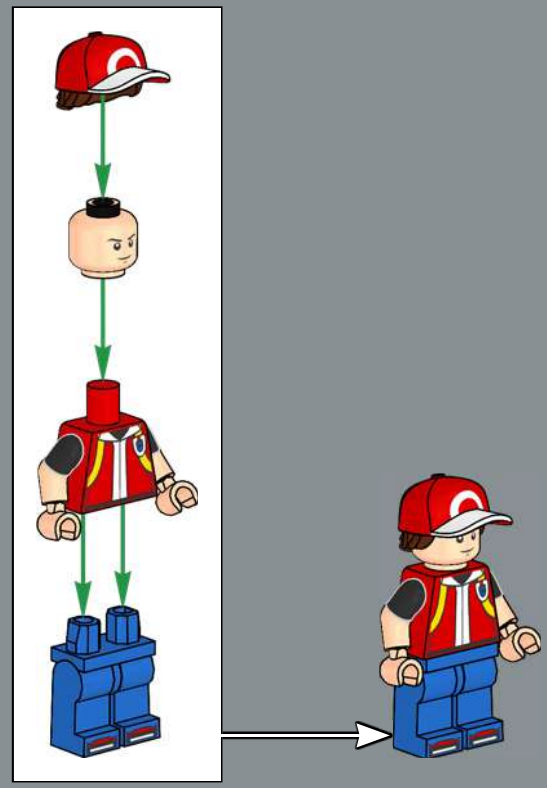

From the LEGO® Pokémon™ Trainers

We wanted to recreate the thrill of starting your Trainer journey with a fun building experience and a novel display that encapsulates the core essence of the Pokémon world. With LEGO® bricks, the simpler the shape, the more challenging it usually is to build, and we used lots of creative techniques, new elements and minifigures for the final touches. The model is built in all directions, and we've colour-coded sections of the inner frame to make it easier to position the model correctly. We tested it literally thousands of times, resulting in a solid LEGO Technic inner frame and a brick-built exterior. In the opening/closing and pop-up functions, ball joints provide friction and stability, so the top part of the model can support its own weight when open. Now, stand by for building – let the Trainer journey begin!
