Attention

Please read the following carefully before using the coffee machine to avoid personal injury or machine damage.

*This product is for personal use only.
*After unpacking, make sure the product is intact and all access ories are complete.
*Please keep the packaging bags and accessories out of the reach of children.
*When charging the product, keep it away from children.
*When charging, make sure the coffee machine is under monitoring(especially when use in vehicle), to avoid risk caused by improper charging.
*This product is prohibited from high temperature environment and direct sunshine exposure.
*Do not place the coffee machine in gas or electric burner, oven, microwave or dishwasher.
*Please ONLY use purified water.
*Make sure that water has been filled before heating. Dry-boiling will lead damage to this product. The amount of water added shall not exceed the maximum mark.
*In some cases of continuous heating, the machine will turn off for self-protection due to overheating. Wait 10-15 minutes for the machine to cool down then it will resume working.
*During the heating process, do not open the water chamber cover to avoid hurt by boiling water.
*During extraction, make sure to tighten the locking chamber as much as possible, to avoid the machine cannot bursts capsule properly and water leakage.
*When drinking, be careful of hot coffee.
*When taking out the coffee capsule after extraction, be careful of high temperature.
*After each time use, please wipe the surface of the machine with a towel.
*Do not use any parts not recommended by CERA+.
*Unauthorized or unidentified parts using may cause damage to the machine.
*If the coffee machine is breakdown, please stop using it.

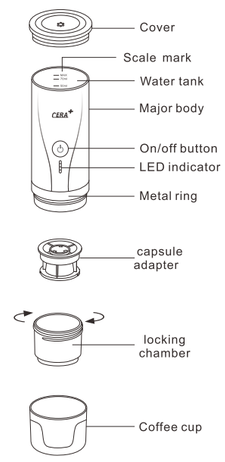

Coffee machine charging and LED Indication

*Please make sure the machine is full charged before using. Please use the charging cable included to charge. Please use 5V/2A adapter to charge.
*The LED light bar indicates the power of the battery, and the real-time water temperature when heating.
*Battery power status: 1-light:25% 2-light:50% 3-light:75% 4-light:100%.
**The real-time water temperature when heating:1-light:20℃ ~40℃(68℉~104℉); 2-light: 40℃~60℃(104℉~140℉); 3-light: 60℃~80℃(140℉~176℉); 4-light: 80℃~96℃(176℉ ~205℉).
*How to know the battery power status? Press the button once to know the power. If the lights flash for 5 times and turns off in turn, it means the machine is with low power and needs to be charged.
*When plug in the charging cable, if the lights is flashing, it means the charging is on the going.Any light flash indicates the battery is not fully charged. When the machine is charged to 100%power, 4 lights are on for 1 minute and then turns off.
*During charging, above 50% power, the machine can heat and extract. Below 50% power, the machine can not heat but extract is OK.
*For PCM03, if the lights flash for 5 times and one light is on for 2 seconds, the machine is with low power and can not heat, but extraction is OK.

Buzzer Indication

*The buzzer sounds 1 beep when the machine starts to heat.
*During heating, the buzzer sounds series of 10 beeps means heating completed.
*Why the buzzer sounds series of 3 beeps and then turn machine off when using?
①Non-stop coffee making lead to overheating battery. Continuous heating time interval should be greater than 5 minutes.
②There is no water in the tank.
③The machine is out of power.
