- Battery: 7.4V, 2x800mAh
- Input: 5V ⎓ 2A
- Capacity: Max 22g
- Product Size: 58*58*185mm

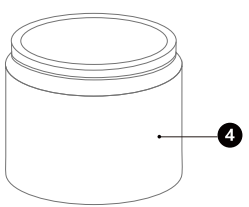

1. Control Panel
2. Power Unit
3. Grinding Unit
4. Powder Cup
5. USB Charge
6. Indicator Light
7. ON/OFF
8. Grinding Adjustment
9. Type-C Cable
10. Brush

How To Use

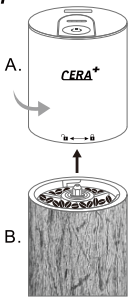

Step1:

Keep B in place, then rotate A clockwise to detach the grinding unit from the power unit.
Add the beans into the grinding unit (maximum 22g).

Attention: Failure of locking the grinding unit and the power unit may occur if the loading of the beans is too full.

Step2:

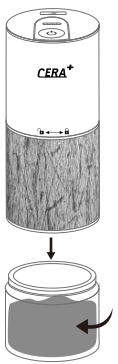

Keep B in place, then rotate A counter clockwise to secure the grinding unit and power unit.

Step3:

Power on: Quick double press the button or long press the button for 1 second, and the machine starts to work. When the coffee beans are all grinded, the machine stops automatically.
During the grinding, press the button once to stop working

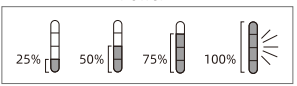

Step4:

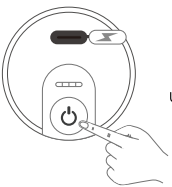

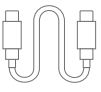

Remove the ground coffee by holding the power unit in one hand and the powder cup in the other hand. Rotate and pull out the powder cup simultaneously, then take out the powder from the cup.

Charging

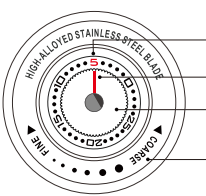

Use 5V/2A adapter for charging

Check the battery power status first, slightly press the button once to show the power.

Charging: During charging, indicator light is flashing, when fully charged, all the lights on, and off in one minute.

When fully charged, it can grind 250g of espresso and 400g of Americano

Adjust Coffee Ground Fineness

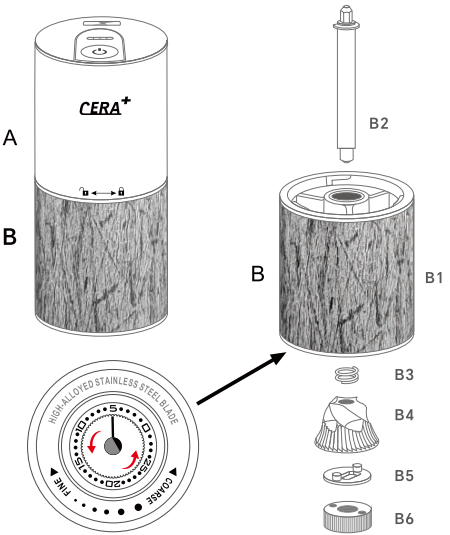

*Factory Setting: 5 (Suitable for most espresso making).

*Please refer to Grinding Recommendation for various grinding.

*Find your best choice.

Cleaning And Maintenance

*First, lock the **[A B components]**. Rotate **[B6]** counterclockwise approximately **[10]** turns before disassembling.

C.

Attention:

Stop working before cleaning or removing any parts.

Do not put A into diswasher.

Clean A by wet cloth and dry it.

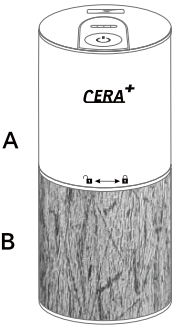

All the accessories can be washed by water except A.

Be careful when cleaning the blade as it is very sharp.

Clean the machine after each use.

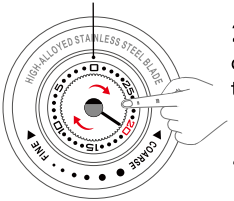

Put the machine in the dry place.

Zeroing Procedure for the Scale

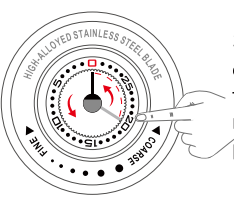

1. First, lock the **[A B components]**.

[Zero Point]

2. Rotate the adjustment dial clockwise until it stops turning.

Note: The scale line will always point to any scale smaller than **[0]** (such as...**15**..**20**...**25**...)

3. Rotate the adjustment dial counterclockwise until the scale points to the **[0]** mark, indicating the zeroing process is complete.

[Using scale 20 as an example]
